

SEBASTIAN HOYOS

FRONTEND DEVELOPER

EXPERIENCE

Academic

Full-Stack Developer (2022 - Present)

Development of a vet clinic which offers a preferential membership for dogs and cats, and provides products and services to its members.

- Developed using React and Redux Toolkit for state management
- The REST API was built using ExpressJS.
- MongoDB was configured for data storage.
- The Scrum methodology was implemented as a framework for work.
- I was assigned as the team leader.

Volunteering

Wilco Ambassador (2023 - Presente)

Currently, I belong to an ambassador program at a company located in Israel, dedicated to improving the skills of developers through programming challenges.

Responsibilities include:

- Assist the community on Discord.
- Create new challenges for Frontend, Backend, and Database.
- Review and select quality code on GitHub to provide solutions to the community through blogs.
- Work along the Wilco team to enrich the knowledge base.
